

Product Stewardship Policy

As part of our ongoing commitment to lessening our environmental impact, E.M.UTICK have made a commitment to takeback Office furniture from GreenStar Projects to reuse or recycle laminate and hardware and divert materials from landfill where ever possible.

The Office furniture has been designed for disassembly to ensure that all Individual components can be recycled and reused if possible.

We advise the client informs E.M.UTICK when specifying the project of their intent to take up the take back system. Please contact our SALES department for a quote to initiate the collection of Office furniture for recycling.
